

NOTE: Colour and shade variation are inherent qualities in all fired ceramic products.

Middle Earth Handcrafted Ploughman Pavers are a brick shaped paver that has been crafted in the traditional centuries old techniques, Manufactured from a mixture of high iron content clays which after being shaped by wire cutting are fired at temperatures over 1100 C. With time the pavers will acquire a unique aged patina that will highlight the natural colours of the clay. Ploughman Pavers have individual colour and patterns making their own textures and designs and offer a unique effect, creating a lasting non-slip pavement. Clay being a natural material provides a richness of colour which does not fade with time.

The ideal installation of Ploughman Pavers is installing on a mortar bed over a compacted metal base. With this method any variation in paver thickness, can be easily adjusted. The joints can be up to 12mm wide, and when grouted will not allow growth (weeds) between the pavers as well as controlling ants nesting between joints.

Benefits Middle Earth Ploughman Pavers offer:

Paver Colours: Flashed Terracotta

High Strength - with a "tile quality" surface

Suitable for driveways - and paths and swimming pools

Do not Reflect Sunlight - will not dazzle

Long Lasting - easy to maintain and no pattern or glaze to wear out

Colourfast - will not fade with age (unlike concrete, will not effloresce through free lime in the cement)

Factory Treated - to protect the pavers from water absorption and frost protection

Easily Installed - can be installed on a compacted metal fines base (no concrete base required). Ideal for D.I.Y. installation.

Size: 230x115x33mm

Coverage: 36 Ploughman Pavers per square metre

Weight: 60 kgs per square metre
