

Inspired by Friedensreich Hundertwasser, an international acclaimed Austrian painter, architect and sculptor, Middle Earth tiles are able to offer a unique design and tile supply service for tiling projects that require a individual organic tiling style.

Courtyard under construction

Home patio

Common themes of Hundertwasser's original design was the rejection of the straight line "the devil's tools" and the use of bright colours, organic forms, a reconciliation of humans with nature with a strong individualism. His architectural work is comparable to Antoni Gaudí in its use of tile. He is renowned for his revolutionary architectural designs, which incorporate natural features of the landscape, and use of irregular forms in his building design, his designs often featured undulating floors ("an uneven floor is a melody to the feet") and roofs covered with earth and grass.

Middle Earth Organic Tiling Service

The Middle Earth Organic tiling service is headed by Chris Southern who worked closely with Hundertwasser on the iconic Kawakawa toilet block. Chris will provide you with an individual concept vision and overall plan for your unique project. While we can never totally replicate Hundertwasser's original designs our concept will have flowing lines and the use of bright colours utilizing our unique tiles and colours to create that special individual design.

Chris will work closely with a recommended tile installer to ensure the final project is created to give you a special and exciting finished design.
